

ABSTRACT OF THE DISCLOSURE

An air conditioning system flush solvent. In a described embodiment, an
5 air conditioning system flush solvent includes, by weight: n-propyl bromide
approximately 99.7%; methyl nonafluoroisobutyl ether approximately 0.1%;
methyl nona fluorobuty ether approximately 0.1%; and methanol approximately
0.1%. The flush solvent is an effective cleaner, evaporates quickly, leaves no
residue, is nonflammable and is relatively low in cost.
